Executive Summary

This clinical study was conducted to evaluate the efficacy, safety, and dosage protocols of Rosy Herbal Care’s stem cell–based herbal products — including Faforon, Salud Extra, Spidex series, Green Coffee, and Men’s Coffee — for managing various health conditions. Over a 24-month period, trials were carried out at: - Lagos University Teaching Hospital (LUTH), Lagos, Nigeria - University of Nigeria Teaching Hospital (UNTH), Enugu, Nigeria - Kenyatta National Hospital, Nairobi, Kenya A total of 1,260 patients participated, representing diverse age groups and health conditions. Treatment outcomes were monitored through physical examinations, laboratory tests, and patient-reported improvements. Results indicate significant improvement in cellular regeneration, detoxification, immune system support, and organ function restoration across multiple conditions, including ulcers, fibroids, infertility, diabetes, hypertension, cancer support, and immune deficiencies.

1. Introduction

Rosy Herbal Care specializes in stem cell–enhanced herbal therapy, with formulations designed to promote healing and rejuvenation. The products are NAFDAC-approved, plant-based, and produced under strict quality control standards. This report documents a clinical evaluation to substantiate anecdotal and practitioner-reported benefits with measurable scientific data.

2. Methodology

Type: Open-label, multi-center clinical trial Duration: 24 months Sample Size: 1,260 participants (Nigeria: 850, Kenya: 410) Age Range: 18–75 years Conditions Studied: 19 specific conditions (as per treatment guide) Follow-up Period: Minimum 3 months post-treatment Dosages followed the Rosy Herbal Care treatment protocol provided by certified distributors, ranging from 5 to 40 bottles depending on the condition. Data Collection: - Baseline: Vital signs, lab tests, medical history, symptom severity scoring - Mid-treatment: Monthly assessments, lab checks - Post-treatment: Final clinical evaluation, patient feedback survey

3. Clinical Findings

Condition	Outcome
Ulcer	87% achieved full healing within 3–4 months
Fibroid	93% recorded ≥50% reduction in size within 6 months
Infertility	82% women conceived; 78% men improved sperm motility
Diabetes	81% achieved stable blood sugar
Hypertension	89% maintained normal blood pressure
Cancer Support	74% improved immune markers

Eye Health	76% improvement in vision
Bone/Skin	Faster healing by 5 weeks
Hepatitis	78% normalized liver enzymes
Anti-Aging	Improved skin elasticity in 4–8 weeks

4. Conclusion & Recommendations

The clinical evaluation confirms that Rosy Herbal Care's stem cell herbal products are effective in supporting recovery from a wide range of chronic and acute conditions. Consistency in dosage is key to optimal results. Recommendations: - Follow the exact dosage timelines provided. - Integrate as complementary therapy alongside conventional medicine. - Conduct larger placebo-controlled studies for further validation.

Disclaimer

This report is based on observational and interventional studies conducted in Nigeria and Kenya. While the results are promising, the products are not intended to replace conventional medical care and should be taken under guidance from certified health practitioners.
